Department of Botany

Government Degree College, Chodavaram was established in 1981. It has been serving the educational needs of the students of Chodavaram region.

Botany Department: Botany department was established in 1981, to teach quality education in the field of plant sciences & to sensitize students towards the need for conserving nature. The study of Botany is very important as plants are fundamental part of life on globe. It targets at providing an environment that encourages, promotes and stimulates the students to learn about the plants. It also helps the student to promote personal development of the student. A three-year bachelor's degree program in Botany provides the foundation for future botanists to pursue a graduate level education or find an entry-level career.

The course introduces to students the importance of plants. In the three year under graduate course students will learn important mechanisms of plants and morphology of the plants. At the end of each semester, a few activities are conducted which are relevant to the syllabus. Those are like Algal collections, mushroom collection, field trips, project works, maintenance of plant diversity on campus, nursery visits to observe routine activities of plant nursery are few of the activities. These activities facilitate the students to learn the subject outside the classroom environment.
